

## **IN THE SPECIFICATION**

**On page 3, please replace paragraph 2 with the following:**

Web pages are usually collections of data including text, audio, video, and interlaced computer programs. Each web page ~~locates~~ is located on a specific electronic site, which is accessed through a device known as a web server, and can be accessed supposedly by anyone via the Internet. Web page browsing allows a person to inspect the contents of a web page on a remote server to glean various information contained therein, including, for instance, product data, company backgrounds, and other such information that can be digitized. The remote server data is accessed by a local browser, and the information is usually displayed as text, graphics, audio, and video.
